

# NEW TOOL FOR YOUR DIGITAL MAKEUP KIT

Makeup artists, now more than ever, are creating content and photographing their work to meet the ever-increasing demands of social media. However, campaign-quality results simply cannot be achieved through face-editing apps, and Photoshop can be daunting for beginners. The MUA Retouch Panel was born out of necessity, combining familiar makeup techniques and terminology with powerful pro-level retouching scripts. Beauty retouching can now be achieved in a delicate and thoughtful way by those who know beauty best.

JORDAN LIBERTY,  
Makeup Artist, Photographer & Educator

# QUICK START GUIDE

Welcome to your new professional retouching workflow with RA Panels!

We are very excited for you to begin using the MUA Retouch Panel and will be here to help should any issues arise with its installation or usage.

**Please follow these simple steps to get started:**

- Use the Promo Code you are provided with to add the panel to your account: [MUA Retouch UXP](#)
- Login to your Member Account to download the installation package: [Downloads](#)
- Find the latest installation & activation instructions [here](#);
- Watch our [Video Tutorials](#) to learn how to use each script;
- Be sure to check out our FREE [Photoshop Basics Course](#) for the MUA Panel users;
- Contact our [Support Team](#) if you need any help with the MUA Retouch Panel;
- Tag us [@retouchingpanels](#), #rapanel or #muapanel when posting your work on Instagram so we can

share it on our page for you as well!

Enjoy and happy retouching!

# COMPACT INTERFACE. ENDLESS POSSIBILITIES.

The MUA Retouch UXP Panel consists of four main sections, each responsible for specific parts of your post-production workflow.

The **top section of the panel** hosts the key retouching tools as well as the basic exposure and color temperature correction buttons.

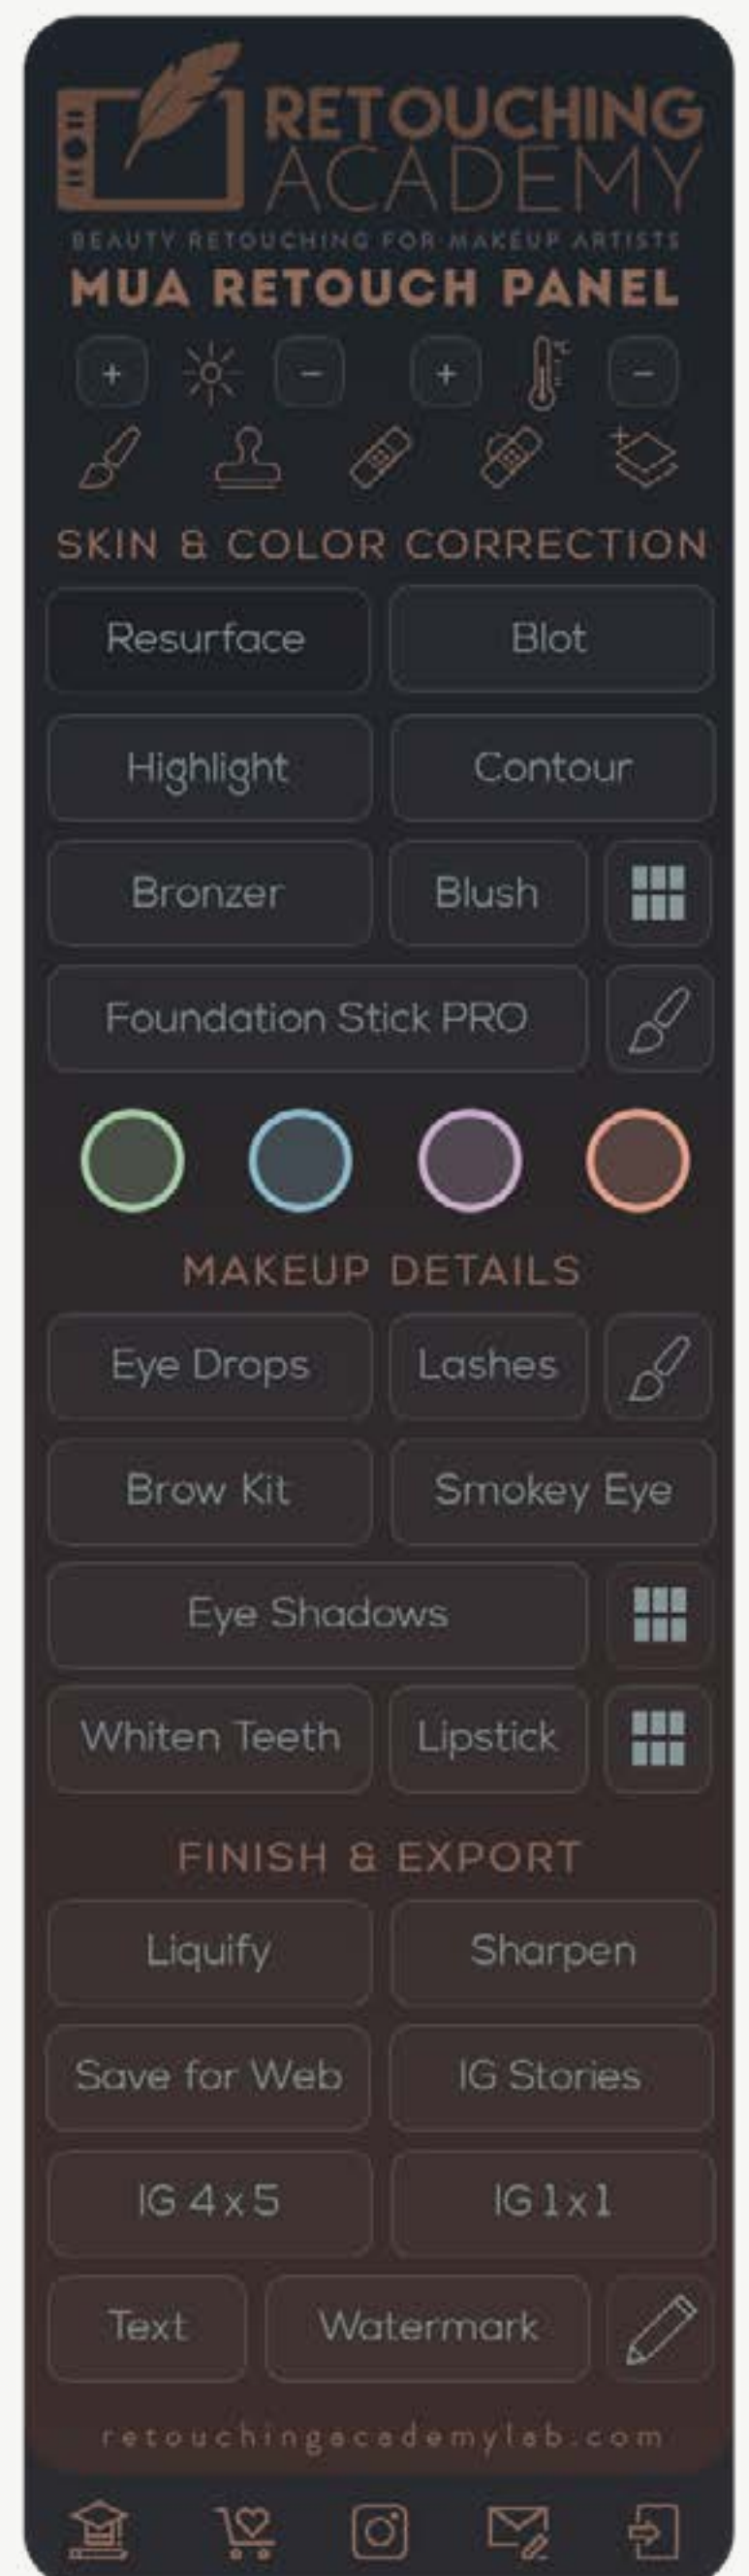

The **Skin & Color Correction** section offers a range of buttons that will set up the necessary layers for you to clean up, even out and color correct the skin as well as enhance the shapes, contours, highlights and shadows in your images.

The **Makeup Details** section contains a range of buttons that will help with correcting and enhancing the eye, brow and lip makeup and also offers a couple handy scripts to whiten the teeth quickly, add vitality to the eyes and even fill in eyelashes and brows when needed.

The **Finish & Export** section will take all the guesswork out of the final steps of your post-production. Adjust shapes, sharpen, crop and export your images in the correct file format and size to ensure your work looks as intended on your website and social media. You can also add your watermark and text with the click of a button.

The **bottom row** of buttons will take you to the useful pages on our website, including your Member Account and Support page.

# FUTURE UPDATES

Thank you for choosing our MUA Retouch Panel!

The new RA UXP Panels have been successfully tested and are fully compatible with the officially licensed Adobe® Photoshop® CC2021 (v22.0) and all subsequent versions for both Windows and Mac OS, including M1/M2-chip Apple computers.

While we strive to test the panels with as many configurations as possible, it's virtually impossible to predict all potential issues. If you encounter any installation or operation problems, please visit this [FAQ page](#) and contact our [Customer Support](#) team.

Whenever we update the RA UXP Panels for new Photoshop versions, our users with an active Maintenance subscription get the latest files free of charge from the [Downloads](#) tab in their Member Account.

We always notify RA Panel users about updates via our [newsletter](#), [social media](#) & [blog](#), so be sure to follow us!

# ENJOYING OUR SMART PANELS? HERE ARE A FEW RETOUCHING COURSES YOU WILL LIKE
